Photoshop CS3 Essentials - 2 days

Description

Our Photoshop CS3 training is a blended learning solution which combines our 2 day instructor led Photoshop CS3 Essentials training course, with 6 months access to our Learning Management System (LMS) including the Photoshop CS3 training slides and demos, course discussion forums, extensive glossary, additional exercises and samples, and other online learning support.

The 2 day Photoshop CS3 Essentials course is run monthly at our London centre or available at your own location, and is a great way to get up and running with Photoshop. The course is suitable for anybody new to Photoshop CS3.

Course Overview

Lesson 1: Exploring Photoshop

- * Smart filters

Lesson 4: Working with Layers and Selections

- * Create and Use Layers
- * Create and Use Smart Objects
- * Create Layer Styles
- * Work with Multiple Layers
- * Create and Modify Selections

Post Course Online Support Including:

Course slides, movies and exercises: You will have 6 months post course access to course slides, movies and exercises via our Learning Management System (LMS). Refresh your memory or rework something in your own time and environment.

6 Months Post Course Support: You will have 6 months post course support via the LMS. This is in the form of the course forums in which you can post questions on any topic within the course that you are struggling with, and the instructor (and sometimes other delegates) will respond.

Additional Sample Files: In addition to the files used in the course, the LMS gives you the ability to work through additional sample files, and real world examples thereby extending both your understanding of Photoshop CS3 and your ability to apply the techniques.

Photoshop CS3 Glossary: The Photoshop CS3 training glossary allows you to search through a wide range of Photoshop CS3 terms, functions, data types etc. Due to the glossary being autolinked within our forums and other material, this also acts as a valuable quick reference directory when working through the material.

Useful Resources: Our instructors spend a vast amount of research time on technologies like Photoshop, and in doing so come across a lot of useful 3rd party material. In this section we republish links to some of the more useful resources they come across.

Photoshop CS3 Skills Assessment: As part of the course you will also have the opportunity to take the Photoshop CS3 Skills Assessment test. This multiple choice test is made up of 36 random questions, and is run over a timed period of 30 minutes. It is designed to give you an idea of how well your skills are developing and can be a nice way to measure improvement, not to mention provide feedback to management showing the value of the course.

Photoshop CS3 Essentials cont

Course Details
